

Dragon Heaters

Castle Build

*6" Castle Build
Equivalent to 12 radiators*

Construction

- Can be built in less than a day
- Uses common chimney flue liners to minimize cost
- Exterior optionally covered to match decor
- Small foot print

High performance

- 86-92% efficient combustion
- Ultra low emissions
- Burns at 1300°-2000° F
- Surface temperature normally less than 200° F
- Exhaust exit temps less than 200° F
- 4 hours of burning will typically provide 12 hours of heat

*Flues used to build
Heat Storage
Chambers*

	4"	6"	8"
Footprint (in.)	23x31	30x36	36x48
Heat BTUs/hr	6k	13k	20k
Burn BTUs/hr	15k-20k	35k-45k	60k-70k
Aprox. Weight lbs	1100	1800	3000
Size of Wood	1-1.5"	1.5-2"	2-3"
Bell Flue size	18x18	18x18	24x24

The short columns are the combustion system and the tall columns are the heat storage chambers.
